# SMART SECURITY SOLUTIONS FOR AIRPORTS

Maintain safety and security across terminals, checkpoints, tarmacs and parking lots with Motorola Solutions' integrated ecosystem of video, access control and critical communications solutions.

## SECURE RESTRICTED AREAS

**Avigilon Appearance Search™ technology** enables you to quickly initiate a search for a person or vehicle using specific physical descriptions, such as a person's gender, whether they are a child or adult, and their hair and clothing color. Similarly, search for vehicles by vehicle type and color.

## SECURE RESTRICTED AREAS

Manage staff and traveller access to buildings and restricted areas using our **Access Control Manager (ACM)** system. **Unified with ACC video management software**, ACM allows you to detect someone at an access control point and quickly verify the situation with live camera views.

## RECEIVE LICENSE PLATE ALERTS

**License plate recognition analytics** automatically reads license plate information from vehicles, linking it to security video for fast search and investigation. Create and import license plate watch lists so that ACC software can provide you with alerts when a specific vehicle plate is detected.

## CREATE FACIAL RECOGNITION WATCH LISTS

AI-powered **facial recognition technology** helps accelerate response times by identifying people of interest from secure watch lists that are managed by authorized users at your airport. If a match is found, you'll receive an alert within ACC video management software so that you can quickly take action.

## EASY INTEGRATION AND COST SAVINGS

Avigilon solutions are built on an open platform for easy integration with third-party software and hardware, giving you the flexibility to leverage their existing resources and investments.

## SAFETY ACT DESIGNATION

Avigilon's video security systems have received full designation as a Qualified Anti-Terrorism Technology and ACM software has received the Developmental Testing and Evaluation designation.

### ADMIN OFFICE AND SECURITY CHECKPOINTS ACM SYSTEM
Manage security in one place. Instantly detect someone at the entrance and verify the situation with camera views on a unified, easy-to-use system.

### AIRCRAFT PARKING AND CARGO AREAS H4 IR PTZ
Strategically face the camera to different zones. Offers infrared illumination for low-light conditions.

### EXCEPTIONAL IMAGE DETAIL H5 PRO
Receive broad coverage across vast areas like runways and cargo with large detail.

### PERIMETER H4 THERMAL
Operates under challenging conditions while minimizing false alarms.

### EMPLOYEE ENTRANCE H4 VIDEO INTERCOM
Quickly and easily identify a visitor before remotely granting access.

### RETAIL AND CHECK-IN COUNTERS H5A FISHEYE
Gain a 360° view of all the most important areas within your airport.

### PARKING LOT H4 LPC
Quickly find captured licenseplate video for investigations.

### INTERSECTIONS, BUILDING CORNERS H4 MULTISENSOR
Locate employees, travelers or unauthorized visitors across the airport.
